

it can also  
be the  
body

Active inference  
says there  
is a normative  
formal way to  
describe these  
two

So from AI point  
of view they look for  
"meat" strategy

Active inference

Active inference is a normative theory that tries

Bayes Optimal Behavior and Cognition

```
graph LR; A[Active inference is a normative theory that tries] --- B{Bayes Optimal Behavior and Cognition}; B --> C(( ))
```
