* an experiment must be designed such that we prove ~~with~~ "being equiped" with one "ability" an agent or a set of agents is more aware of itself

this ability is probably language

goal

sensors taken actions obss goals world → language

language → add more words and structure to language

add more words and structure to language ← No ← is the language enough

is the language enough → yes → x

novelty → (loops back to add more words and structure to language)

novelty ← No (from is the language enough)
